- medication_duration_days (7 / 15 / 30)
- created_at

3. Medications Table (consultation_medications)

- id
- consultation_id (FK)
- medicine_type (NUMERIC / TEXT)
- medicine_value

4. Dosage Table (medication_dosage)

- id
- consultation_medication_id (FK)
- times_per_day
- balls_per_dose
- instructions (optional)

5. Doctor Flow

- Login
- View appointments (date + slot)
- Select patient
- Add symptoms, advice, duration
- Add multiple medicines
- Add dosage (times/day, balls/dose)
- Save consultation

6. Example

Duration: 15 days

Symptoms: Fever, headache

Advice: Avoid cold drinks

Medicines:

1. Numeric: 30 → 2 times/day, 4 balls
2. Text: Belladonna → 3 times/day, 3 balls

7. APIs

- GET /doctor/appointments
- GET /appointment/{id}
- POST /consultation/create
- GET /consultation/{appointment_id}

8. Rules

- Multiple medicines per consultation
- Each medicine has separate dosage
- Numeric range: 3–150
- Duration: 7 / 15 / 30 days

Summary

One appointment → One consultation

One consultation → Multiple medicines

Each medicine → Separate dosage
